APPENDIX F:
HAZARDOUS MATERIALS

Laboratory Scale & Bulk Chemical Hazards List

Laboratory-scale hazard classes & examples	Bulk chemical hazards (≥ 55 Gal)	Max Storage Quantity
Oxidizers: Inorganic Nitrates, Nitrites, Permanganates, Chlorates, Iodates, Periodates, Persulfates, Chromates, Hypochlorites, Peroxides, Potassium perchlorate, Calcium hypochlorite, Sodium nitrate. **Oxidizing acids:** Nitric acid, Hydrogen peroxide, Chromic acid **Flammable liquids:** Methanol, Ethanol, Acetone, Xylene, Toluene, Ethyl acetate, Tetrahydrofuran, Ethyl ether, Benzene, Dimethylformamide, Acetonitrile, Hexane, Pyridine, etc. **Flammable compressed gases:** Hydrogen, oxygen, acetylene, etc. **Nonflammable compressed gases:** Carbon dioxide, nitrogen, helium, etc. **Inorganic bases:** Metal hydroxides such as Sodium, Potassium, Calcium, Nickel hydroxide, Ammonium hydroxide, **Organic bases:** Amines such as Ethanolamine, Tributylamine, etc. **Acidic Flammable Liquids:** Glacial acetic acid (100%), Acetic acid (>80%), Acetic anhydride, Formic acid (>85%), Propanoic acid (100%) **Organic Acids:** Pentanoic acid, etc. **Inorganic acids:** Hydrochloric acid, Sulfuric acid, Phosphoric acid, Hydrofluoric Acid, etc	**Waste flammable solvents** (e.g., methanol, ethanol, acetone, acetonitrile, hexane, etc.) **Effluent Decontamination Tank Chemicals** • NaOH • Phosphoric acid **Waste oil** **Guanidine thiocyanate waste**	**8 drums (55 gal)** **3 drums (55 gal)** **3 drums (55 gal)** **3 drums (55 gal)** **2 drums (55 gal)**

Poisons (Toxic chemicals) Many are in aqueous solution, but they are also available as mixtures or pure compounds, such as Acrylamide, Formaldehyde, Glutaraldehyde, Chloroform, Phenol, Methylene chloride Toxic metal salts such as Silver chloride, Cadmium sulfate, Mercury acetate, Barium carbonate, Lead acetate, etc. Biological stains **Cyanides** Sodium cyanide, Potassium cyanide, Calcium cyanide **Sulfides** Lead sulfide, Iron sulfide **Water-reactives** Alkali metals such as Sodium, Lithium, Potassium Metal powders such as Alumium, Iron, Magnesium, Manganese, Zinc **Water-Reactive acids** Chlorosilanes such as Dimethyldichlorosilane, Ethyltrichlorosilane Acid halides such as Acetyl chloride **Non-Hazardous or non-regulated chemicals** Buffers, Surfactants, Ion exchange resins, Alumina, Silica, Culture media, Agarose, Albumin, Pump oil, Non-hazardous salts such as Sodium chloride, Magnesium sulfate, Potassium phosphate, Calcium acetate, etc. **Human blood, body fluids, and other diagnostic specimens** (e.g., urine, cerebrospinal fluid, sputum samples) **Animal diagnostic specimens** (Rabies Lab) **Cultures of infectious agents handled at Biosafety Level 2 or Biosafety Level 3**			

Radioactive materials and sealed sources used for research and/or testing purposes in accordance with our radioactive materials license (e.g., C-14, tritium, P-32, etc.).

Re: **Proposed Wadsworth Consolidated Lab**
Harriman State Office Campus
Albany, NY 12203
AKRF Project Number 230738

Dear Mr. Derico:

AKRF, Inc. (AKRF) is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Subject Property. This report includes the findings of a reconnaissance of the Subject Property, and an evaluation of readily available historical information and selected environmental databases and electronic records. The report meets the requirements of ASTM Standard E1527-21, unless noted otherwise in Section 7.0, "Limitations and Data Gaps."

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.

Rebecca Kinal, P.E.
Sr. Vice President

Senior Professional

Proposed Wadsworth Consolidated Lab

ALBANY, NEW YORK

Phase I Environmental Site Assessment

AKRF Project Number: 230738

Prepared for:
Office of Environmental Affairs
Dormitory Authority of the State of New York
515 Broadway
Albany, New York 12207

Prepared by:

AKRF, Inc.
440 Park Avenue South
New York, NY 10016

SEPTEMBER 2024

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by the Dormitory Authority of the State of New York (DASNY) (Client and User) to prepare a Phase I Environmental Site Assessment (ESA) of the Proposed Wadsworth Consolidated Lab property, a portion of the larger State Office Building Campus, in the city of Albany, Albany County, New York (the Subject Property). The approximately 27-acre Subject Property, which consists of a portion of tax parcel #53.00-1-2, currently includes four asphalt-paved surface parking lots, associated roadways, hardscaped walkways, landscaped areas, and a landscape maintenance yard. The Subject Property, located at the eastern end of the campus, is generally bounded by Campus Access Road to the north, south, and east, and to the west by other portions of the State Office Building Campus, including government office buildings, asphalt-paved surface parking lots, and hardscaped and landscaped areas. Historical uses of the Subject Property included State Office Buildings #1 and #2, which were constructed in the late 1950s and subsequently demolished in the 2010s, and their associated asphalt-paved surface parking lots, which are still in use currently.

This Phase I ESA was performed in conformance with ASTM Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Any exceptions to, or deletions from, the Standard are described in Section 7.0. The term "Recognized Environmental Condition" or REC (as defined in the E1527-21 Standard) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The Standard also includes definitions of Historic REC (HREC), Controlled REC (CREC), and *De Minimis* Condition. A *De Minimis* Condition is defined as a condition that does not present a threat to human health or the environment and that generally would not be subject to enforcement action if brought to the attention of appropriate government agencies.

A summary of the assessment findings is presented below:

No RECs, HRECs, or CRECs were identified.

De Minimis Conditions

- Parking lot B in the southeastern portion of the Subject Property was being used for the staging of vehicles prior to automotive auction. Some of these vehicles were noted to be in significantly damaged condition with staining observed on the asphalt surface in the area. Cracks/holes in the asphalt may allowed leaking automotive fluids to reach the subsurface, but not likely at volumes representative of a reportable spill.
- Improper housekeeping of concrete washout from former on-site construction activity was present in the central portion of the Subject Property.

Business Environmental Risks (including items outside the scope of ASTM E1527-21 such as asbestos containing material [ACM], lead-based paint [LBP] and/or polychlorinated biphenyls [PCBs] in building materials or fill/debris)

- Based previous reports provided to AKRF by DASNY and OGS, painted surfaces on the former building at the Subject Property (State Office Buildings #1 and #2) were known to contain lead-based paint (LBP) and lead-containing paint (LCP). It is anticipated that demolition of the buildings included provisions for proper management and disposal of any building materials with LBP or LCP; however, LBP or LCP may be present on remaining portions of the Building #2 sub-basement walls/slab, on sub-surface utilities, and/or other construction debris/fill material.

- Based on the age of the former Subject Property buildings and documents provided to AKRF by DASNY and OGS, asbestos-containing materials (ACM) was known to be present in State Office Buildings #1 and #2. Previous reports provided to AKRF documented the removal of ACM during building demolition and subsequent testing conducted in May 2024 indicated that waterproofing on the remaining Building #1 foundation did not contain asbestos; however, ACM may be present in on remaining portions of the Building #2 sub-basement walls/slab and/or on remaining sub-surface utility lines.
- PCB containing materials could be present within subsurface utility(s)/manholes and construction debris/fill material. In addition, fixtures/ballasts in the overhead lighting for the parking lots could contain PCBs, and associated fluorescent light bulbs could contain mercury.
- No source documentation or testing was available for the materials that were used to backfill the State Office Building #2 basement following demolition or for soil stockpiles observed in the central portion of the Subject Property during AKRF's inspection. Testing would be needed to determine whether these materials contain contaminants at levels that would require special handling and/or disposal during future excavation and construction.

Recommendations

Based on the conclusions of this Phase I ESA, AKRF recommends the following:

- All soil and fill excavated as part of construction of the new facility should be managed in accordance with all applicable regulations. All soil intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility, and transportation of all material leaving the Subject Property for off-site disposal should be done in accordance with Federal, State and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- If tanks, drums, or other unexpected sources of subsurface contamination are discovered during excavation activities, they should be removed in accordance with all applicable regulations. Any associated soil and groundwater contamination should be remediated in accordance with the State and local requirements. Any evidence of a petroleum spill must be reported to the New York State Department of Environmental Conservation (NYSDEC) and addressed in accordance with applicable requirements.
- A comprehensive survey should be conducted to identify ACM and potential hazardous materials (e.g., PCBs, mercury) that may be affected by future demolition/construction activities. Based on the survey's findings, all identified materials must be removed and disposed of in accordance with applicable Federal, State, and local requirements.
- Demolition activities with the potential to disturb LBP or LCP must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62 – Lead Exposure in Construction).
- If dewatering is required during new building construction, it should be performed in accordance with applicable State and local requirements, including those for discharge to sanitary or storm sewers if applicable. Pretreatment should be performed if necessary to meet applicable sewer discharge permit requirements.

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by the Dormitory Authority of the State of New York (DASNY) (Client and User) to prepare a Phase I Environmental Site Assessment (ESA) of the Proposed Wadsworth Consolidated Lab property, a portion of the larger State Office Building Campus, in the city of Albany, Albany County, New York (the Subject Property). The approximately 27-acre Subject Property, which consists of a portion of tax parcel #53.00-1-2, currently includes four asphalt-paved surface parking lots, associated roadways, hardscaped walkways, landscaped areas, and a landscape maintenance yard. The Subject Property, located at the eastern end of the campus, is generally bounded by Campus Access Road to the north, south, and east, and to the west by other portions of the State Office Building Campus, including government office buildings, asphalt-paved surface parking lots, and hardscaped and landscaped areas. Historical uses of the Subject Property included State Office Buildings #1 and #2, which were constructed in the late 1950s and subsequently demolished in the 2010s, and their associated asphalt-paved surface parking lots, which are still in use currently.

The greater surrounding area was primarily residential, with some parkland, educational, and commercial uses. The objective of this assessment was to identify any potential environmental concerns associated with the Subject Property resulting from past or current usage of the Subject Property or neighboring properties.

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the processes described herein, *Recognized Environmental Conditions* (RECs) in connection with the Subject Property.

This assessment was performed in conformance with ASTM Standard E1527-21 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process)*. Any exceptions to, or deletions from, the Standard are described in Section 7.0. The scope included the following:

- Observations of the Subject Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; leaks; odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns**.**
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Subject Property.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical land use maps for the Subject Property and nearby sites were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Subject Property and other properties within the ASTM-defined radii: the National Priority List (NPL); Superfund Enterprise Management System (SEMS), including Superfund Enterprise Management System Archive (SEMS-ARCHIVE); Comprehensive Environmental Response, Compensation, and Liability Information System-No Further Remedial Action Planned (CERCLIS-NFRAP); Corrective Actions Report (CORRACTS); Resource Conservation and Recovery Information System (RCRIS); and Emergency Response Notification System (ERNS). Federal ASTM supplemental records reviewed included: Toxic Chemical Release Inventory System (TRIS); Superfund Consent Decrees (CONSENT); Records of Decision (ROD); National Priority List Deletions (Delisted NPL); and United States Brownfields.

- The following state regulatory databases were reviewed to determine the regulatory status of the Subject Property and other properties within a predetermined radii: petroleum and hazardous material spills (SPILLS); Leaking Underground Storage Tanks (LTANKs); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Hazardous Substance Waste Disposal Site Inventory (HSWDS); Major Oil Storage Facilities (MOSF); Environmental Restoration Program (ERP); Voluntary Cleanup Program (VCP); New York Brownfield Cleanup Program (BCP); and Environmental Data Resources, Inc. (EDR) High Risk Historical Records including US Historic Auto Station Listings, Historic Cleaners, and Manufactured Gas Plant (MGP) Sites.
- Local agency reviews, including online Buildings and Finance Department records were conducted for the Subject Property only.
- Review of historic reports including non-ASTM scope items.

1.1 Selected Definitions

The following terms are used throughout this report and, for the purpose of clarity, corresponding definitions are provided. These terms are fully defined in ASTM E1527-21.

- *Recognized Environmental Condition (REC)* – (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.
- *Controlled Recognized Environmental Condition (CREC)* – a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).
- *Historical Recognized Environmental Condition (HREC)* – a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations).
- *Significant Data Gap* – A data gap that affects the ability of the environmental professional to identify a REC.
- *Vapor Encroachment Condition (VEC)* – The presence or likely presence of chemical of concern vapors in the subsurface of a property caused by the release of vapors from contaminated soil, groundwater, or both, either on or near the Subject Property.

2.0 PHYSICAL SITE DESCRIPTION

On April 25, 2024, Mr. Stephen Schmid of AKRF conducted a reconnaissance of the Subject Property. AKRF was accompanied by Mr. Robert Derico of DASNY, and New York State Office of General Services (OGS) personnel, including maintenance staff. At the time of the inspection, the weather was sunny and approximately 55 ºF with good visibility. The Subject Property was inspected for the presence of stained surfaces and soil, evidence of storage tanks, drums, leaking pipes, transformers, and any other evidence of hazardous material usage and storage on-site. Neighboring properties were also viewed, but only from public rights-of-way. Photographs documenting the inspection are included in Appendix A.

2.1 General Site Description

The Subject Property, consists of an approximately 27-acre area located at the eastern end of the larger State Office Building Campus, generally bounded by Campus Access Road to the north, south, and east, and to the west by other portions of the State Office Building Campus, including government office buildings, additional asphalt-paved surface parking lots with overhead lighting, and hardscaped and landscaped areas (as shown on Figure 1). The Subject Property consisted of four asphalt-paved surface parking lots (designated as Parking Logs A, B, C, and P), associated roadways, hardscaped walkways, landscaped areas, undeveloped vegetated areas, and a landscape maintenance yard (as shown on Figure 2).

The Subject Property's asphalt-paved surface parking lots and roadways typically exhibited minor surficial cracking and small potholes, some of which had been repaired with asphalt patching. More significant potholes, some of which extended into the asphalt subbase were predominantly noted in the eastern portion of the Subject Property. Parking Lots C, P, and A were used for parking by State office workers and According to the OGS representatives, parking Lot B was being used as a staging area for surplus NYS-owned vehicles awaiting sale at an automotive auction. Some of the vehicles were observed to be in significantly damaged condition, with associated staining of the asphalt surface observed. Vegetated areas adjacent to the parking lots consisted of well-maintained lawns with some shrubbery and large trees.

The central portion of the Subject Property contained vacant areas, at the former locations of State Office Buildings #1 and #2. Apparent remnants from previous construction/demolition activities were observed in these areas, and included jersey barriers, un-covered stockpiles of gravel and soil up to approximately 5 cubic yards in size, and areas of concrete washout. The washout appeared to have overflowed from designated containment bins in some areas, and to have discharged directly to the ground surface in others. A landscape yard surrounded by an approximately 7-foot-high chain-link fence contained additional jersey barriers, stockpiles of various materials, a shipping container (viewed from the exterior only), a front-end loader, dump truck, and box truck. The OGS representatives indicated that the yard is used for staging materials associated with landscaping/maintenance activities for the campus, and that the stockpiled materials included leaf litter, tree branches, gravel, mulch, sand, soil, and washout removed from on-site catch basins. Standing water from a recent rain even was observed in the center of the yard with no evidence of contamination observed.

Numerous utility boxes, access covers, and manways were observed in both the asphalt-paved and vegetated portions of the Subject Property for steam piping, catch basins, water lines, storm sewer manways, and electrical for overhead lighting. No evidence of chemical or petroleum storage was observed at the Subject Property. No dispenser equipment, fuel pumping equipment, fuel oil fill or vent piping or other evidence of current petroleum bulk storage operations were noted on the Subject Property. As noted below, no stressed vegetation, staining or odors, pits, ponds or lagoons or evidence of illegal dumping were noted in the inspected areas. No apparent wetland areas were

noted during the site reconnaissance and no wetland areas were mapped on the Subject Property in the U.S. Fish and Wildlife National Wetlands Inventory (NWI) mapping tool.

Strong, Pungent, or Noxious Odors

No strong, pungent, or noxious odors indicative of a material release were observed at the Subject Property.

Standing Surface Water and Pools Containing Liquid

No pools with liquids potentially containing hazardous materials or petroleum were observed at the Subject Property. Standing water from a recent rain event was noted in the maintenance yard with no signs of contamination observed.

Drains and Sumps

Stormwater drains were observed in the asphalt-paved parking areas and storm sewer manways were observed in vegetated areas. Some of the drainage structures were labeled "Dump No Waste Drains To Waterway", while others were unlabeled. OGS representatives were not aware of the discharge points associated with unlabeled structures. No sumps were observed.

Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed at the Subject Property.

Storage Containers or Drums

No drums or other bulk storage containers were observed at the Subject Property.

Stained Soil or Pavement, Stressed Vegetation

No evidence of stained soil or vegetative stress was observed at the Subject Property. Minor areas of stained asphalt pavement were noted in Parking Lot B where vehicles awaiting automotive auction were stated, including some which were significantly damaged.

Wells (including dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells)

No evidence of wells was observed at the Subject Property.

Septic Systems or Cesspools

No evidence of septic systems or cesspools were observed at the Subject Property.

Areas Graded by Non-Natural Causes/Fill of Unknown Origin

Based on documentation provided by OGS and DASNY, the sub-basement of former on-site Building #2 was backfilled after building demolition. In addition, gravel and soil stockpiles up to approximately 5 cubic yards in size were present in the central portion of the Subject Property and appeared to be related to former construction/demolition activities.

2.2 Topography and Hydrogeology

Based on the U.S. Geological Survey (USGS), 1:24,000 Albany, New York 2019 Quadrangle map, the Subject Property is approximately 250 feet above the North American Vertical Datum (NAVD) of 1988 (an approximation of mean sea level). The topography at the Subject Property is generally level.

According to the USDA Soil Conservation Service (SCS) STATSGO data, summarized in the regulatory agency database report, soil in the area of the site is characterized as the Colonie series, which refers to loamy fine sand with high infiltration rates.

Based on local topography and historical geotechnical reports, groundwater is anticipated to flow in s west-southwesterly direction. However, actual groundwater flow can be affected by bedrock or geologic heterogeneities, underground utilities, and other factors beyond the scope of this study. Groundwater at the Subject Property is not used as a source of drinking water, as the Subject Property and surrounding area are serviced by the municipal water supply.

2.3 Aboveground Storage Tanks (ASTs)/Underground Storage Tanks (USTs)

No dispenser equipment, fuel pumping equipment, fuel oil fill or vent piping or other obvious signs of current petroleum bulk storage uses were noted on the Subject Property.

Previous utility maps provided to AKRF for review (summarized in Section 6.0) indicated that an underground storage tank (UST) of unknown size with an overfill alarm was historically present on the Site, north adjacent to State Office Building #2 prior to its demolition. Potential buried structures and/or demolition debris in the Subject Property's fill could include historical USTs associated with previous structures.

Off-site ASTs/USTs are discussed in Section 4.2.2.

2.4 Polychlorinated Biphenyls (PCBs)

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

No structures are present on the Subject Property; however, PCB containing materials could be present within subsurface utility(s)/manholes and construction debris/fill material. In addition, fixtures/ballasts in the overhead lighting for the parking lot could contain PCBs, and associated fluorescent light bulbs could contain mercury.

2.5 Lead-Based Paint (LBP)

After 1977, the use of lead-based paint inside commercial structures was also restricted and its use elsewhere became less common, but lead-based paint may still sometimes be used outdoors. Lead-based paint can present a hazard, particularly to children, especially when it is in poor condition.

No painted structures were present on the Subject Property; however, demolition plans provided to AKRF (summarized in Section 6.0) indicated that the former on-site structures had surfaces coated with LBP and lead-containing paint (LCP). LPB and/or LCP may be found within subsurface utility(s)/manholes and construction debris/fill material. Paint striping for parking spaces was also observed throughout the asphalt-paved portions of the Subject Property.

2.6 Utilities

National Grid provides electricity to the Subject Property, and electricity and natural gas to the surrounding area. Buildings on the State Office Campus are connected to the municipal water and sewer systems. The municipal water supply is provided by the City of Albany Department of Water (Albany Water).

2.7 Waste Management and Chemical Handling

No waste was being generated at the Subject Property at the time of the reconnaissance, and no evidence of chemical storage or on-site hazardous waste operations were observed.

2.8 Radon

Radon is a colorless, odorless gas most commonly produced by the natural radioactive decay of certain rocks. According to a New York State Department of Health database (updated May 2023) the average level of basement radon in the City of Albany, Albany County was found to be 1.03 picoCuries per liter (pCi/L), which is below the USEPA recommended action level of 4.0 pCi/L.

2.9 Asbestos-Containing Material (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Materials containing more than one percent asbestos are considered ACM. Typical ACM includes: flooring, thermal system insulation, fireproofing, plaster, joint compound, ceiling tiles, roofing materials, waterproofing mastics, caulks, mortars, vermiculite, and other building materials. ACM is classified as either friable (i.e., more readily release fibers, such as spray-applied fireproofing or pipe insulation) or non-friable (such as floor tiles and roofing materials).

Suspect ACM was not observed during the reconnaissance; however, demolition plans provided to AKRF (see Section 6.0) indicated that the basement through third floor slabs/deck assemblies of the former on-site structures were to be removed as asbestos. Subsequent testing conducted in May 2024 indicated that waterproofing on the remaining Building #1 foundation did not contain asbestos; however, ACM may be present on remaining portions of the Building #2 sub-basement walls/slab and/or subsurface utility(s)/manholes, debris, and/or fill material. In the event any suspect ACM is encountered during future excavation, it should be sampled and disposed of in accordance with applicable requirements.

2.10 Per-and Polyfluoroalkyl Substances (PFAS)

Per- and polyfluoroalkyl substances (PFAS) are a class of chemicals found in fire-suppression foam, fire and stain retardants, water repellant materials, non-stick coatings, and many other materials (e.g., cosmetics and personal care products, etc.). PFAS may discharge to the environment through releases during manufacturing, wastewater discharges from industrial and commercial processes involving PFAS-containing products, or the use of fire-suppression foam during an emergency response. In April 2024, the USEPA finalized a rule designating two widely used PFAS [perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS)], as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

Current and historical uses of the Subject Property and adjoining/surrounding properties were reviewed to identify potential sources of PFAS at or around the Subject Property. The regulatory agency database report was also reviewed to determine if the Subject Property or any nearby facilities potentially used and/or stored fire suppression foam. In addition, representatives of the Subject Property were interviewed to obtain information related to historical fires at and around the Subject Property.

Interviews with site representatives and the review of historical documentation and regulatory agency database reports did not reveal evidence that PFAS or PFAS-containing products would have been generated or handled at the Subject Property or the nearby surrounding properties.

3.0 ADJACENT LAND USE

The Subject Property is located at the eastern end of the larger State Office Building Campus, and is generally bounded by Campus Access Road to the north, south, and east, and to the west by other portions of the campus, including government office buildings, asphalt-paved surface parking lots, and hardscaped and landscaped areas (as shown on Figure 2). The area surrounding the campus consists of a predominantly residential neighborhood with single to multi-family structures and some parkland, commercial, and educational uses, including the University at Albany campus to the west. State Route 85 is located between the campus and residential areas to the east.

4.0 RECORDS REVIEW

4.1 Prior Ownership and Usage

4.1.1 Historical Land Use Maps

Historical maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Subject Property. Specifically, Sanborn Fire Insurance Maps dated 1935, 1951, 1989, 1992 through 1995, and 1997 were reviewed. Copies of the maps are provided in Appendix B.

1935

Subject Property:

The Subject Property was not mapped.

Surrounding Properties:

The surrounding area to the east consisted of residential use and was sparsely developed with one- to two-story dwellings. Gridded roadways were depicted, some of which were labeled as unpaved. The surrounding areas to the north, south, and west were unmapped.

1951

Subject Property:

The Subject Property was not mapped.

Surrounding Properties:

The surrounding area to the east remained similar in nature to the 1935 maps and was developed with additional one- to two-story dwellings. A note dated July 1948 depicted within lot 13-69-178 indicated that all territory west of Brevator Street was now property of the state of New York, and all buildings in the area were subject to removal. The surrounding areas to the north, south, and west was unmapped.

1989 to 1997

Subject Property:

The Subject Property was not mapped.

Surrounding Properties:

The surrounding area to the east, beyond Brevator Street, was further developed with additional one- to two-story dwellings and residences. The area to the west of Brevator Street, previously indicated as property of the state of New York on the 1951 maps, had been developed with the Albany Crosstown Arterial Roadway (which appears to be at the location of the current State Route 85). The surrounding areas to the north, south, and west were unmapped.

In summary, the Subject Property, and the surrounding areas to the north, south, and west, were not mapped on the historical Sanborn maps. The surrounding area to the east was sparsely developed prior to 1935 with one- to two-story dwellings and gridded roadways, some of which were unpaved. The area to the east continued to experience further residential development with one- to two-story dwellings and residences from 1935 until its current configuration was shown on the 1989 maps. A note dated July 1948 depicted on the 1951 maps indicated that the state of New York had obtained all property to the west

of Brevator Street, and all buildings were subject to removal. By 1989, the property to the west of Brevator Street had been developed with the Albany Crosstown Arterial Roadway.

4.1.2 Historical Topographic Maps

Historical topographic maps for the Subject Property and surrounding area were reviewed from the United States Geological Survey (USGS) topographic map collection. Specifically, the 1893, 1895, 1898, 1927, 1947, 1950, 1953, 1978, 1980, 1994, 2013, 2016 and 2019 maps were reviewed (Albany, NY quadrangles). Copies of the maps are provided in Appendix B.

The historical topographic maps indicated that the Subject Property was undeveloped vacant land from 1893 to 1898 and the surrounding area contained railroad tracks to the north and was sparsely developed with roadways and unidentified structures. By 1927, roadway spurs and unlabeled structures were depicted on the Subject Property, and the surrounding area was undergoing urban development with numerous new roadways and unidentified structures depicted. From 1947 to 1950 no changes were noted at the Subject Property and the surrounding area continued to experience additional urban development. By 1953, structures and roadways were no longer depicted at the Subject Property; the surrounding area remained similar to the 1950 map with parkland depicted and some structures now labeled, including numerous educational buildings, hospitals, a monastery, a convent, a radio tower, sewage disposal, reservoirs, a country club, and a water facility. By 1978 the Subject Property contained two unlabeled structures, associated roadways, and four parking lots, and by 1980 was labeled as part of the State Office Building Campus. The surrounding area contained perimeter roadways adjacent to the Subject Property and had been further developed consistent with current uses and density. The 2013, 2016, and 2019 maps depicted only major roadways and topography surrounding the Site; no structures or other details are shown on these maps.

The topography of the Subject Property was generally level. The surrounding area generally sloped slightly downgradient to the north and east, towards an unlabeled stream. The historical topographic map review did not identify any wetlands or former water bodies on the Subject Property.

4.1.3 Historical Aerial Photographs

Historical aerial photographs for the Subject Property and surrounding area were reviewed from the Environmental Data Resource, Inc Aerial Photo Decade Package. Specifically, photographs from 1952, 1960, 1977, 1985, 1994, 1995, 2006, 2011, 2015, and 2019 maps were reviewed (Albany, NY quadrangles). Copies of the maps are provided in Appendix B.

The aerial photographs indicated that the Subject Property was predominantly vegetated land in 1952 with three roadways running east/west across the site. The surrounding areas to the north and west were vegetated with minimal development, and the areas to the south and east were developed with structures typical of single-family homes. By 1960, the Subject Property contained two large structures typical of office use and two parking lots with associated roadways; the surrounding area remained similar to the 1950 photograph. By 1977, two additional parking lots had been developed on the Subject Property, and the State office campus had been fully developed with office buildings, parking lots, and a perimeter roadway system in areas west, north, and south of the Site. The surrounding area to the east remained typical of a residential neighborhood. The Subject Property and surrounding area remained similar from 1977 through 2011. By 2015 and 2019, respectively, the southern and northern structures at the Subject Property had been

demolished. The four parking lots and associated roadways remained, consistent with current uses.

4.1.4 Tax Files and Zoning Records

Based on a property information search obtained from the Albany County Geographic Information Systems (GIS) database, the Subject Property is zoned as MU-CI (Mixed-Use, Campus/Institutions).

4.1.5 Local Street Directories

A City Directory prepared by Environmental Data Resources, Inc. was reviewed as part of this Phase I ESA. The City Directory consisted of the names of businesses located on-site and in adjacent properties, compiled from city and reverse telephone at approximately five-year intervals starting in 1930.

The City Directory review did not identify any uses at the Subject Property. In the surrounding areas, the directories identified predominantly residential uses. Non-residential uses that were identified included:

- SUNY A Campus Entrance located at 71 Belvidere Avenue (east-adjacent block) in 1997.
- Unspecified Improvement located at 139 Melrose Avenue (east-adjacent block) in 1981.
- Kelley J Frank Real Estate located at 70 Rosemont Street (east-adjacent block) in 1975.

The City Directory search results are included in Appendix C.

4.1.6 Interviews

Subject Property Owners/Operators/Occupants

Site personnel indicated that the Subject Property formerly contained two buildings occupied by NYS offices (demolished by 2019) and would undergo redevelopment for construction of a New York State Department of Health public health laboratory, including associated parking, roadway, infrastructure, and landscaping improvements. The project would consolidate five facilities currently operating across New York State into one central location at the Wadsworth Center, located on the Harriman Office Campus Complex. Future construction is anticipated to include significant subsurface disturbance.

Owners/Operators/Occupants of Adjacent Properties

Owners/operators/occupants of adjoining properties were not available for interview as part of this assessment.

4.2 Regulatory Records Review

EDR/Lightbox of Shelton, Connecticut, was contracted to obtain information regarding the regulatory status of the Subject Property and the surrounding area. This information included records from databases maintained by the USEPA and NYSDEC, and proprietary databases compiled by EDR. AKRF reviewed these records to identify the use, generation, storage, treatment, and/or disposal of hazardous material and chemicals, or releases of such materials, which may have impacted the Subject Property. All applicable regulatory databases met ASTM guidelines requesting utilization of information within 90 days' receipt from the appropriate agency. A copy of the EDR report is included in Appendix D.

A summary of the regulatory agency databases reviewed and identified RECs is provided in the following table:

Database	Search Radius*	No. of Sites within Search Radius	Subject Property Appears on List	RECs, CRECs, HRECs, VECs Identified
Federal ASTM Standard Records				
National Priority List (NPL) and Delisted NPL	1 mile	1/0	NO	NO
Superfund Enterprise Management System (SEMS) and SEMS-ARCHIVE	½ mile	1/0	NO	NO
Corrective Action Report (CORRACTS)	1 mile	2	NO	NO
Resource Conservation and Recovery Act - Treatment, Storage, and Disposal Facilities (RCRA-TSDF)	½ mile	0	NO	NO
Resource Conservation and Recovery Act Generators (RCRA LQG/SQG/VSQG/ Non-Gen)**	⅛ mile	1/0/0/1	NO	NO
Emergency Response Notification System (ERNS)	Subject Property	0	NO	NO
Federal Institutional Control/Engineering Control Registries	½ mile	0/0	NO	NO
Federal ASTM Supplemental Records				
Toxic Chemical Release Inventory System (TRIS)	¼ mile	0	NO	NO
Superfund Consent Decrees (CONSENT)	1 mile	0	NO	NO
Record of Decision (ROD)	1 mile	1	NO	NO
US Brownfields	½ mile	0	NO	NO
US Aerometric Information Retrieval System Facility Subsystem (AIRS)	Subject Property	0	NO	NO
Integrated Compliance Information System (ICIS)	Subject Property	0	NO	NO
Facility Index System/Facility Registry System (FINDS)	Subject Property	0	NO	NO
Enforcement and Compliance History Information (ECHO)	Subject Property	0	NO	NO
State ASTM Standard Records				
New York State Inactive Hazardous Waste Disposal Site (SHWS)	1 mile	1	NO	NO
Hazardous Substance Waste Disposal Site Inventory (HSWDS)	½ mile	0	NO	NO
Solid Waste Facilities/Landfill Sites (SWF/LF)	½ mile	1	NO	NO
Vapor Reopened	½ mile	1	NO	NO
New York State Spills Information Database (NY Spills)/Leaking Storage Tank Incident Reports (LTANKs)	½ mile	67^{+}/12	NO	NO
Petroleum Bulk Storage Tanks (USTs/ASTs)	⅛ mile	1/1	NO	NO
Major Oil Storage Facility (MOSF)	⅛ mile	0	NO	NO

Database	Search Radius*	No. of Sites within Search Radius	Subject Property Appears on List	RECs, CRECs, HRECs, VECs Identified
Chemical Bulk Storage Tanks (CBS)	⅛ mile	0	NO	NO
Voluntary and Brownfield Cleanup Program Sites	½ mile	0/0	NO	NO
Environmental Restoration Program Sites	½ mile	0	NO	NO
State Institutional Control/Engineering Control Registries	½ mile	0/0	NO	NO
State/EDR Supplemental Records				
Registered Drycleaners	½ mile	0	NO	NO
NY/RI Manifests (MANIFEST)	¼ mile	1/0	NO	NO
E-Designation Sites	⅛ mile	0	NO	NO
EDR Manufactured Gas Plants (Coal Gas)	¼ mile	0	NO	NO
EDR Historical Auto Stations	¼ mile	0	NO	NO
EDR Historical Cleaners	½ mile	0	NO	NO

* The surrounding area search radius indicates the radial area (measured from the perimeter of the Subject Property) for which the databases review was performed.
**Large quantity generators (LQGs), small quantity generators (SQGs), very small quantity generators (VSQG), and non-generators (Non-Gen).
+Includes one additional spills listing from EDRs supplementary Spills 80 database.

A description of the types of records maintained for each of the databases reviewed is included in Appendix D. A summary of the facilities listed in the regulatory database report and any associated RECs/CRECs/HRECs/VECs identified based on the information provided in the database is provided below in Sections 4.2.1 and 4.2.2. Additional details for specific sites identified as part of the regulatory database review can be found in Appendix D.

4.2.1 Federal

National Priority List (NPL) and Delisted NPL Sites

The NPL is USEPA's database of some of the most serious uncontrolled or abandoned hazardous waste sites identified for probable remedial action under the Superfund Program. These sites may constitute an immediate threat to human health and the environment. Due to the amount of public attention focused on NPL sites, they pose a significant risk of stigmatizing surrounding properties and potentially impacting property values. The database includes sites where USEPA had determined that no further federal response is needed based on criterial established by the National Oil and Hazardous Substances Pollution Contingency Plan (NCP).

The Subject Property was not listed on the NPL database. One NPL site identified as Mercury Refining Inc. is located at 26 Railroad Avenue, within a one-mile radius of the Subject Property. This site is also listed in other databases including CORRACTS and ROD. Listing details indicate that the site is a 0.5-acre mercury refining site where battery dumping has resulted in chromium, PCB, cadmium, and lead contamination at least 3 feet deep, and adjacent to the Patroon Creek, a tributary to the Hudson River. Based on the distance from the Subject Property (nearly one mile to the northwest) and inferred crossgradient groundwater flow direction, the contamination associated with this facility is not anticipated to have affected environmental conditions at the Subject Property.

Superfund Enterprise Management System (SEMS), including Superfund Enterprise Management System Archive (SEMS-ARCHIVE)

The SEMS (formerly known as CERCLIS) list is a compilation of known and suspected uncontrolled or abandoned hazardous waste sites which are, or were, under investigation by USEPA but have not been elevated to the status of a Superfund (NPL) site. Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP), currently known as Superfund Enterprise Management System Archive (SEMS-ARCHIVE) sites, are also included in this database.

The Subject Property was not listed on the SEMS or SEMS-ARCHIVE databases. One SEMS site identified as Norton Co. is located on Elm Street, within a ½-mile radius of the Subject Property. Based on listing details and its location (nearly 1,700 feet to the north-northeast), this facility is not anticipated to have affected environmental conditions at the Subject Property. No SEMS-ARCHIVE sites were identified within a ½-mile radius of the Subject Property.

Correction Action Reports (CORRACTS)

The CORRACTS database identifies hazardous waste handlers with RCRA corrective action activity.

The Subject Property was not listed on the CORRACTS database. Two CORRACTS sites were identified within a one-mile radius of the Subject Property: Mercury Refining Company, Inc. at 26 Railroad Avenue; and US DOE Colonie Storage Site at 1130 Central Avenue. The Mercury Refining Company facility is also listed in the NPL and ROD databases, and the US DOE Colonie Storage Site is also listed in the SHWS database (as the Colonie FUSRAP Site). Based on the locations of these sites and other listing details, these facilities are not anticipated to have affected the environmental conditions at the Subject Property.

Resource Conservation and Recovery Information System (RCRIS)

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDF); very small quantity generators (VSQG), small quantity generators (SQG), large quantity generators (LQG) and non-generators regulated under RCRA. The discussion below includes any CORRACTS listings of facilities which are subject to corrective action under RCRA.

The Subject Property was not listed in the RCRIS databases. One RCRA LQG identified as NYSDOT BIN 1060360 is located at the Washington Avenue Bridge on Route 85. Two RCRA non-generators identified as NYSDOT BIN 1060350 and NYSDOT BIN 1015980 are located at structure B over Route 85 and Route 20 over Route 85, respectively. No violations were reported and the NYSDOT BIN 1015980 listing also contained a NY manifest for the disposal of lead. These listings are likely associated with LBP abatement activities from roadway overpass/underpass structures and are not anticipated to have affected subsurface conditions at the Subject Property.

No VSQG or SQG were listed within a ⅛-mile radius and no TSDF listings were identified within a ½-mile radius.

Records of Decision (ROD)

ROD documents mandate permanent remedies at NPL sites and contain technical and health information to aid in the cleanup.

The Subject Property was not listed on the ROD database. One ROD site, the previously mentioned Mercury Refining Inc was listed within a one-mile radius of the Subject Property. Based on the distance from the Subject Property and inferred downgradient groundwater flow direction, the contamination associated with this facility is not anticipated to have affected environmental conditions at the Subject Property.

US Brownfields

The US Brownfields program is for properties that report cleanups to USEPA and are served by Brownfields grant programs.

The Subject Property was not listed on the US Brownfields database. No US Brownfields sites were identified within a ½-mile radius of the Subject Property.

Aerometric Information Retrieval System Facility Subsystem (US AIRS/AFS)

The US AIRS/AFS database is a sub-system of the Aerometric Information Retrieval System (AIRS) database and contains compliance data on air pollution point sources regulated by the USEPA and/or state and local air regulatory agencies.

The Subject Property was not listed in the US AIRS/AFS database.

Integrated Compliance Information System (ICIS)

The ICIS database contains data from the National Pollutant Discharge Elimination System (NPDES) program.

The Subject Property was not listed on the ICIS database.

Facility Index System/Facility Registry System (FINDS)

FINDS contains facility information from the following databases: Permit Compliance System (PCS), Aerometric Information Retrieval System (AIRS), Enforcement Docket (DOCKET) used to manage and track information on civil judicial enforcement cases for all environmental statutes, Federal Underground Injection Control (FURS), Criminal Docket System (C-DOCKET) used to track criminal enforcement actions for all environmental statutes, Federal Facilities Information System (FFIS), State Environmental Laws and Statutes (STATE), and PCB Activity Data System (PADS).

The Subject Property was not listed on the USEPA FINDS database.

Enforcement & Compliance History Information (ECHO)

ECHO provides integrated compliance and enforcement information for regulated facilities nationwide.

The Subject Property was not listed on the ECHO database.

4.2.2 State

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program, also known as State Superfund, lists information regarding a variety of sites likely requiring cleanup.

The Subject Property was not listed on the SHWS database. One SHWS site identified as the Colonie FUSRAP Site is located at 1130 Central Avenue, within a one-mile radius of the Subject Property. The approximately 3-acre site was formerly used for uranium processing in the 1950s and ceased operations around 1984. Based on its location

(approximately ¾ of a mile to the north), this facility is not anticipated to have affected subsurface conditions at the Subject Property.

Solid Waste Facilities/Landfill Sites (SWF/LF)

The SWF/LF database is a comprehensive listing of state permitted/recorded solid waste management facilities including certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

The Subject Property was not identified on the SWF/LF database. One SWF/LF site, identified as the New York State Department of Agriculture and Markets Lab, was identified at State Office Building Campus, within a ½-mile radius of the Subject Property. Activity includes regulated medical waste with on-site treatment. Based on the listing details and the distance from the Subject Property, this facility is not anticipated to have affected subsurface conditions at the Subject Property.

New York State Spills Information Database (NY SPILLS)/Leaking Underground Storage Tanks (LTANKs)

This database includes releases reported to NYSDEC, including tank test failures (for USTs only) and tank failures.

The Subject Property was not listed on the NY Spills and LTANKS databases.

A total of 67 spills and 12 LTANKS were reported on surrounding properties within a ½-mile radius, including some associated with other buildings on the State Office Campus. Based on listing details, including nature of the spills, distance from the Subject Property, and/or inferred groundwater flow direction, the spill listings are not anticipated to have affected subsurface conditions at the Subject Property.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

The Subject Property was not listed on the PBS database. The NYSP Forensic Investigation Center, located in Building 30 on the State Office Campus, is listed in the PBS database (facility ID 4-029653) with one in-service 6000-gallon diesel UST, one in-service 200-gallon diesel AST, and two closed-removed 6,000-gallon gasoline USTs. Based on the location of Building 30 (approximately 3,000 feet to the west) and the lack of associated Spill listings, this PBS facility is not anticipated to have affected subsurface conditions at the Subject Property.

4.2.3 Local Agency File Review

A FOIL request for computerized records from the Albany Fire Department and Albany Department of Buildings and Regulatory Compliance were submitted on May 14, 2024 for the Subject Property. Since the local records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. To date, no responses have been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings. Copies of pertinent information are included in Appendix E.

Albany County Property Records

Electronic property records from the Albany County Department of Management and Budget were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Subject Property.

Computerized records for the Subject Property identified the following:

- The Subject Property was serviced by municipal sewer and domestic water systems.
- The Subject Property Class was listed as MU-CI (Mixed-Use, Campus/Institutions).

No additional pertinent environmental records were identified in the Albany County electronic files.

Land Title Records and Tax Records

Copies of title records were not provided by DASNY to AKRF for review. A FOIL request for computerized historic deed records was submitted to the Albany County Clerks Office on May 14, 2024. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

4.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in the judgment of the environmental professional, such records for the Subject Property or any adjoining properties would be reasonably ascertainable, useful, accurate, and complete in light of the objective of the records review. These records may include:

- Local Brownfields Lists
- Local Lists of Landfill/Solid Waste Disposal Sites
- Local Lists of Hazardous Waste/Contaminated Sites
- Local Lists of Registered Tanks
- Local Land Records (for property use limitations)
- Records of Emergency Release Reports
- Records of Contaminated Public Wells

Sources for these records include:

- Chain of Title Reports and Title Records
- Department of Health/Environmental Division
- Fire Department
- Building Permit/Inspection Department
- Local/Regional Pollution Control Agency
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent a FOIL request to NYSDEC Region 4 on May 10, 2024 for the Subject Property to determine whether pertinent environmental records for the Subject Property could be obtained for further review. To NYSDEC responded on June 3, 2024 that a diligent search of their files produced no records for the Subject Property.

AKRF sent a FOIL request to the New York State Department of Health (NYSDOH) on May 10, 2024 for the Subject Property to determine whether pertinent environmental records for the Subject Property could be obtained for further review. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

In AKRF's judgment, no other local records meeting the ASTM criteria are pertinent for the Subject Property.

5.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the Client provide any pertinent information regarding the Subject Property, specifically:

- Whether any environmental liens or activity and land use limitations (AULs) were in place or filed or recorded against the Subject Property.
- Whether they had any specialized knowledge or experience related to the Subject Property or nearby properties (e.g., specialized knowledge of any chemicals used on-site).
- Whether the (anticipated) purchase price reflected that the Subject Property is or could be contaminated.
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Subject Property.
- Whether they were aware of any obvious indicators of contamination at the Subject Property.
- Whether they were aware of any pending, threatened, ongoing, or past litigation/enforcement action/consent order/notice of violation related to hazardous substances or petroleum products.

Mr. Brad Hutton, Associate Commissioner of OGS, was not aware/had no information on the status of any: environmental liens or activity use limitations on the Subject Property; property value reduction due to environmental issues; any pending, threatened, ongoing or past litigation/enticement action/consent order/notice of violation related to hazardous substances or petroleum products, or any obvious indicators of contamination on the Subject Property. Responses to questions 1, 9, and 10 of the user questionnaire were not provided. It is AKRFs understanding that the Phase I is being conducted to satisfy the State Environmental Quality Review (SEQR) process and the hazmat portion of the Environmental Impact Statement (EIS), and that the report will be relied upon by OGS and DASNY. AKRF understands that the Subject Property is a portion of the larger State Office Building Campus, and that information and documents pertaining to the adjacent property have been provided. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

The User Questionnaire is provided as Appendix F.

6.0 PREVIOUS STUDIES

Previous utility maps for the State Office Building Campus, and documentation related to demolition plan of the former on-site State Office Buildings #1 and #2 were provided by DASNY and OGS for AKRF's review. Pertinent information gathered from a review of these documents is presented below. The full reports are included as Appendix G.

MJ Engineering and Land Surveying, P.C., Harriman Campus Utility Study, Existing Water Distribution System, Existing Sanitary Sewer System, and Existing Stormwater System Pipe Diameters, dated February, April, June 2016.

A sanitary sewer map dated April 2016 indicated the presence of 8-inch sanitary piping in the western portion of the Subject Property, likely servicing the former on-site structures, and 18-inch sanitary piping in the southwestern portion of the Subject Property. It is unknown if the 8-inch sanitary piping was demolished with the former buildings, or if it was capped and left in place for future connections. The 18-inch sanitary piping connects to other portions of the greater State Office Building Campus. A February 2016 water distribution system map indicates the presence of a 6-inch water main in the central and eastern portions of the Subject Property, and a June 2016 stormwater system map indicates the presence of 6-inch to 30-inch stormwater lines throughout the Subject Property.

The Chazen Companies, Harriman Campus Utility Worksheet, Project No. 31806.18, dated February 2021.

A utility map dated February 2021 identifies water, sanitary sewer, storm sewer, and electrical lines on the Subject Property. Details on the February 2021 map also indicate that underground utilities in the location of former State Office Building #1 are assumed to have been abandoned at the time of demolition, and show an underground fuel tank of unknown size with overfill alarm north of Building #2 (which is depicted as still being present on the map).

CHA Consulting, Inc., State Office Building #2 Existing Foundation Plan and Existing Sub-Basement Partition Plan, dated December 2015.

Sub-basement and foundation demolition plans of the former State Office Building #2 indicate that the top of the building foundation walls were to be removed to two feet below the lowest point of finished grade. Additionally, 6-inch diameter holes were to be made through foundation walls and mat slabs to mitigate groundwater buildup. General notes on the plans indicate that the floor slab/deck assembly of the basement though third floor were to be removed as asbestos, and that the building contained surfaces that were coated with LBP and LCP. Photographs of the demolition activities provided with the plans showed backfilling of the former sub-basement area; documentation of the source of the backfill included geotechnical compaction data, but no environmental testing.

NYS OGS Design and Construction Submittal Comments, Waste Manifest Records, State Office Building #1, dated September 2014.

The submittal consists of waste manifests documenting the disposal of friable asbestos containing waste and personal protective equipment by Titanium Demolition Group to Waste Management's High Acres Landfill in Fairport, NY. Seventeen loads of waste totaling approximately 180 tons was received by Waste Management between May 2 and 9, 2014. The OGS cover page indicates a review status of "No Exceptions Taken".

Ambient Environmental, Inc., Asbestos Abatement Air and Project Monitoring Close-Out Report, Buildings 1 and 1A Harriman State Office Campus Albany, New York, dated June 2014.

The report documents project monitoring and air monitoring conducted by Ambient Environmental, Inc. during asbestos abatement activities at the Harriman State Office Campus Buildings 1 and 1A from October 2013 through May 2014. The report indicates that, in addition to performing air sampling and inspections,

Ambient Environmental, Inc. monitored the contractor's compliance with all applicable regulations. Per the report, asbestos removal was performed by Gozzer Corp., Lorice Enterprises, Inc., and Titanium Demolition and Remediation Group, each under their individual New York State Asbestos contractor's licenses. Copies of approved work variances and amendments, air and bulk sampling data, locations and chains of custody, daily logs, visual clearance inspections, and licenses and certifications were provided as attachments to the report.

CHA Consulting Inc., Pre-Demolition Hazardous Material Survey Report Building 1/1A, dated March 2006.

The report s a pre-demolition hazardous materials survey of State Office Building 1/1A conducted by CHA Consulting Inc. to assess and document the presence of any ACM, LBP, PCBs, mercury-based thermostats, chlorofluorocarbons (CFCs), and any other hazardous conditions. The results of the investigation identified numerous asbestos containing materials, lead-lined walls, PCB-containing light ballasts, suspect mercury-containing laboratory equipment, and suspect CFC-containing air conditioners and water chillers. Additionally, detectable levels of lead were present in 13 of 14 paint chip samples with a maximum value of 0.25% by weight, below the threshold of 0.5% for lead based paint. Mold and bird guano were not observed.

The report also detailed former uses of the building as office and classroom space, with a former printing shop used to produce xerographic copies. An underground storage tank of unknown size was reported to be closed in-place on the facility. Recommendations consisted of removal of all ACM by a licensed abatement contractor, management of lead-containing paint during demolition activities in accordance with all applicable regulations, and removal of all equipment containing hazardous materials.

HRP Associates, Inc., Tank Closure Report State Office Building Campus Building #2, April 2016.

HRP Associates, Inc., documented the removal of a former 2,000-gallon diesel UST, which was formerly used to fuel an emergency generator. The report states that on Mach 18, 2016, 1,323-gallons of product were removed from the tank and transferred to other USTs on the State Office Building Campus for use. The UST was cleaned on March 28, 2016, and residual sludge and residue was removed using a vac-truck. The UST was excavated and removed on March 29, 2016 and then cut for disposal as scrap metal at Upstate Shredding Albany. According to the report, no evidence of holes or defects were observed during UST removal, and no staining, odors, or PID readings were observed in surrounding soils. Laboratory analytical results for 3 soil samples collected from the bottom of the tank excavation in accordance with NYSDEC DER-10 protocols indicated that no VOCs or SVOCs were detected above laboratory detection limits.

CHA Consulting Inc., Pre-Demolition Hazardous Material Survey Report Building 2, dated December 2015.

The report summarizes a pre-demolition hazardous materials survey of State Office Building 2 conducted by CHA Consulting Inc. to investigation and document the presence of any ACM, LBP, PCBs, mercury-based thermostats, chlorofluorocarbons (CFCs), and any other hazardous conditions. The results of the investigation identified numerous asbestos containing materials, lead-based paints, PCB window glazing, suspect mercury-containing lighting equipment, and suspect CFC-containing air conditioners and water chillers. Mold and bird guano were not observed.

Recommendations consisted of removal of all ACM by a licensed abatement contractor, lead containing paint be managed during demolition activities in accordance with all applicable regulations, and removal of all equipment containing hazardous materials.

The previous utility maps utility maps for the State Office Building Campus, hazardous materials and abatement reports, waste manifests, tank closure report, and sub-basement and foundation demolition plans of the former on-site State Office Buildings #1 and #2.

Waste Manifest Records, State Office Building #2, dated January 2017.

Waste manifests and weight tickets were provided documenting the disposal of approximately 720 tons of friable asbestos C&D at Seneca Meadows landfill in Waterloo, NY. "Building 2, State Office Campus" is listed as the Generator Address on the manifests.

Ambient Environmental, Inc., Letter re: Replace Steam & Condensate Direct Bury Pipe, State Office Building Campus, May 17, 2024

The letter transmits laboratory results for asbestos bulk samples collected on May 8, 2024. The laboratory report lists two samples (001-01 and 001-02) collected from "Building 1 Concrete Foundation – Black Foundation Waterproofing (M)", and indicates a result of "NAD" (no asbestos detected) for both samples.

7.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of ASTM as established by ASTM Standard E1527-21 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- The reconnaissance included inspection of accessible portions of the Subject Property. Underground vaults and other subsurface structures covered by manholes were not inspected.
- Interviews and user-provided information were limited to those discussed in Sections 4.1.6 and 5.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Subject Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Subject Property area history was not conducted in five-year intervals. However, sufficient information about the history of the Subject Property and surrounding area could be obtained from the available historical Sanborn maps and/or city directories, and this data gap is not likely to alter the conclusions of this report.
- Agency File Reviews for the Subject Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 4.2) as well as FOIL requests detailed in Section 4.2.4. AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions (RECs) or other environmental concerns at the Subject Property, and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

No Significant Data Gaps (as defined in Section 3.2.84 of ASTM Standard E1527-21) were identified as part of this assessment.

8.0 CONCLUSIONS

AKRF, Inc. (AKRF) was retained by Dormitory Authority of the State of New York (DASNY) (Client and User) to prepare a Phase I Environmental Site Assessment (ESA) of the Proposed Wadsworth Consolidated Lab property, a portion of the larger State Office Building Campus, in the city of Albany, Albany County, New York (the Subject Property). The approximately 27-acre Subject Property, which consists of a portion of tax parcel #53.00-1-2, is currently includes four asphalt-paved surface parking lots, associated roadways, hardscaped walkways, landscaped areas, and a landscape maintenance yard. The Subject Property, located at the eastern end of the campus, is generally bounded by Campus Access Road to the north, south, and east, and to the west by other portions of the State Office Building Campus, which included government office buildings, additional asphalt-paved surface parking lots, and hardscaped and landscaped areas. Historical uses of the Subject Property included State Office Buildings #1 and #2, which were constructed in the late 1950s and subsequently demolished in the 2010s, and their associated asphalt-paved surface parking lots, which are still in use currently.

This Phase I ESA was performed in conformance with ASTM Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Any exceptions to, or deletions from, the Standard are described in Section 7.0. The term "Recognized Environmental Condition" or REC (as defined in the E1527-21 Standard) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The Standard also includes definitions of Historic REC (HREC), Controlled REC (CREC), and *De Minimis* Condition. A *De Minimis* Condition is defined as a condition that does not present a threat to human health or the environment and that generally would not be subject to enforcement action if brought to the attention of appropriate government agencies.

A summary of the assessment findings is presented below:

No RECs, HRECs, or CRECs were identified.

De Minimis Conditions

- Parking lot B in the southeastern portion of the Subject Property was being used for the staging of vehicles prior to automotive auction. Some of these vehicles were noted to be in significantly damaged condition with staining observed on the asphalt surface in the area. Cracks/holes in the asphalt may allowed leaking automotive fluids to reach the subsurface, but not likely at volumes representative of a reportable spill.
- Improper housekeeping of concrete washout from former on-site construction activity was present in the central portion of the Subject Property.

Business Environmental Risks (including items outside the scope of ASTM E1527-21 such as asbestos containing material [ACM], lead-based paint [LBP] and/or polychlorinated biphenyls [PCBs] in building materials or fill/debris)

- Based previous reports provided to AKRF by DASNY and OGS, painted surfaces on the former building at the Subject Property (State Office Buildings #1 and #2) were known to contain lead-based paint (LBP) and lead-containing paint (LCP). It is anticipated that demolition of the buildings included provisions for proper management and disposal of any building materials with LBP or LCP; however, LBP or LCP may be present on remaining portions of the Building #2 sub-basement walls/slab, on sub-surface utilities, and/or other construction debris/fill material.

- Based on the age of the former Subject Property buildings and documents provided to AKRF by DASNY and OGS, asbestos-containing materials (ACM) was known to be present in State Office Buildings #1 and #2. Previous reports documented the removal of ACM during building demolition and subsequent testing conducted in May 2024 indicated that waterproofing on the remaining Building #1 foundation did not contain asbestos; however, ACM may be present in on remaining portions of the Building #2 sub-basement walls/slab and/or on remaining sub-surface utility lines.
- PCB containing materials could be present within subsurface utility(s)/manholes and construction debris/fill material. In addition, fixtures/ballasts in the overhead lighting for the parking lots could contain PCBs, and associated fluorescent light bulbs could contain mercury.
- No source documentation or testing was available for the materials that were used to backfill the State Office Building #2 basement following demolition or for soil stockpiles observed in the central portion of the Subject Property during AKRF's inspection. Testing would be needed to determine whether these materials contain contaminants at levels that would require special handling and/or disposal during future excavation and construction.

9.0 RECOMMENDATIONS

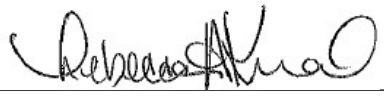

Based on the conclusions of this Phase I ESA, AKRF recommends the following:

- All soil and fill excavated as part of construction of the new facility should be managed in accordance with all applicable regulations. All soil intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility, and transportation of all material leaving the Subject Property for off-site disposal should be done in accordance with Federal, State and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- If tanks, drums, or other unexpected sources of subsurface contamination are discovered during excavation activities, they should be removed in accordance with all applicable regulations. Any associated soil and groundwater contamination should be remediated in accordance with the State and local requirements. Any evidence of a petroleum spill must be reported to the New York State Department of Environmental Conservation (NYSDEC) and addressed in accordance with applicable requirements.
- A comprehensive survey should be conducted to identify ACM and potential hazardous materials (e.g., PCBs, mercury) that may be affected by future demolition/construction activities. Based on the survey's findings, all identified materials must be removed and disposed of in accordance with applicable Federal, State, and local requirements.
- Demolition activities with the potential to disturb LBP or LCP must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62 – Lead Exposure in Construction).
- If dewatering is required during new building construction, it should be performed in accordance with applicable State and local requirements, including those for discharge to sanitary or storm sewers if applicable. Pretreatment should be performed if necessary to meet applicable sewer discharge permit requirements.

10.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.

Rebecca Kinal, P.E. Sr. Vice President	 Signature	9/20/2024 Date
Stephen Schmid Senior Professional	 Signature	9/20/2024 Date

11.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination, on the Subject Property, and to identify, to the extent feasible pursuant to the processes described in the report, *Recognized Environmental Conditions* as defined in ASTM Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*.

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard(s), except as noted otherwise in Section 7.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the Subject Property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the Subject Property and to the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the Subject Property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than DASNY, its affiliates, successors, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AKRF, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 02/29/2024 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EPA Id: NYD048148175

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/29/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.125 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/06/2023 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/13/2023 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 01/24/2024 has revealed that there are

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 01/24/2024 has revealed that there are 66 NY Spills sites within approximately 0.5 miles of the target property.

NY SPILLS 80: Spills 80 includes those spill and release records available from FirstSearch databases prior to 1990. Typically, they may include chemical, oil and/or hazardous substance spills recorded before 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 80.

A review of the NY SPILLS 80 list, as provided by EDR, and dated 11/02/2010 has revealed that there is 1 NY SPILLS 80 site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.125 miles of the target property.

EPA ID: NYD987024403				

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 01/01/2022 has revealed that there is 1 NY VAPOR REOPENED site within approximately 1 mile of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

Summary Details:

Conditions at listing December 1982): Mercury Refining, Inc., processes industrial wastes to reclaim mercury in Colonie, New York, near the Albany City boundary. On the property is a 0.5- acre dumping area littered with thousands of cases ofminiature silver-mercury batteries. Tests indicate the waste is at least 3 feet deep. The site is adjacent to Patroon Creek, a tributary to the Hudson River, which feeds the Three Mile Water Works, an alternate water supply for Albany. Stream sediments have high concentrations of heavy metals, including mercury, as well as PCBs. Status July 1983): EPA is preparing a Remedial Action Master Plan outlining the investigations needed to determine the full extent of cleanup required at the site. It will guide further actions at the site.

Category as of 08/2019:
NPL Status: Currently on the Final NPL
Category Description: Depth To Aquifer-<= 10 Feet
Category Value: 10

NPL Status: Currently on the Final NPL

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	during tank removal an odor of decayed mineral spirits was encounterd - no water to 13 1/2 ft
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was CHRISTENSEN See EDOCs for additional information. PBS 4-388246; see 8706848, 9106363, 9212004, 9708111, 9807825, 9809935, 0509206, 0701693, etc. PBS 4-601082? PBS 4-388157? (NYSP PBS 4-601082; OGS Fleet PBS 4-388246; 8706848, 9106363, 9212004, 9708111 (Edocs), 9807825 (Edocs), 9809935, 0509206, 0701693, 0911781 (Edocs)) 5/21/99 - Received closure report from Alpha Geoscience. Analytical results show minor contamination remains but does not seem to pose any health or environmental concerns.If at a future date this area is excavated any contaminated soil will be disposed of properly at that time. 9/2/99 - REOPENED FILE 01/19/00 - Received subsurface investigation report prepared by Alpha Geoscience along with a remediation proposal which includes the installation of four additional wells and the injection od ORC's into the subsurface. Their proposal is acceptable and a letter to Alpha and OGS will be sent this week. 3/14/00 - Report received from Alpha Geoscience regarding investigation of Spill 98-07825. Five addition wells were installed and 3 of them showed hits for MTBE. They are m/w's 12=12ppb, m/w 13=10ppb and m/w 14=90ppb. Remediation plan includes an array of recovery wells for ground water extraction. Water will be treated and discharge to the sanitary sewer. Sampling of the well will be monthly at the beginning of startup and a flow meter will be installed to record to total gallons of water pumped. Engineering plans to follow. 5/19/00 - Received a supplement proposed remedial action plan for the site. The plan is acceptiable. 01/12/2001 - Have not received any updates on this since receiving the proposed remedical plan. Left message for Alpha to call me. 02/02/2001 - Received High Vacuum Pilot Test Report. A 4 inch Recovery well was installed on September 25, 2000 to depth of 30 feet. (approximately 19 feet below the water table) Pilot Test yielded approx. 2.5 gpm. HVE will be proposed for 6 months and then reviewed. Wells were sampled on September 25 and again on September 28 and on October 25. See report for results. 07/06/2001 - Alpha Geoscience has scheduled the first monthly high vacuum extraction at Building 18 for July 17h with a second scheduled for the middle of August. 07/09/2003 - Received the High Vacuum

STATE OFFICE CAMPUS BLDG 18 (BTWN WASH. & WEST.) (Continued) **S104506061**

Extraction report. There has been a substantial decrease in VOC's in the groundwater. Based on this report and the analytical data it contains, it is recommended that the site be closed with the notation that it does not meet NYS Groundwater Standards. wtc 05/30/2003 - This spill number is closed. See spill number 97-01035 for the active spill number for Building 17. This is the # 6 oil spill. wtc

DEC Memo:	fuel truck roll over/home heating oil...load is leaking and not contained at this time...FD on site...unknown quantity on truck, unknown gals leaked at this time
Remarks:	MF/DW/BB on site. Driver of Main Care truck was believed to have some kind of medical condition. He apparently ran a stop sign, collided with another car, and then rolled over into a lawn. The truck was carrying appx 1900 + 458 - 200 = 2158 gallons of fuel. They pumped off 2019 gallons. They also pumped off the saddle tank, which did not appear to be leaking. The obvious spillage seemed to be caused by the piping that was ripped off the truck, some transmission and motor oil. The truck was eventually righted and towed off site. Main Care then was planning on removing any impacted soil. Later spoke to MainCare. They removed soil and will be sending disposal info when available. Project to be handled by Dan Wehn. 12/11 - MF on site. Some obvious contamination remains on the surface of the soil. MF contacted MainCare and left message for Marcia Booth. She later returned my call and indicated that they will be sending a crew over to remove more soil. She later added that they are going back on Monday to remove more soil. They have George Longworth overseeing the

ROADWAY (Continued) **S118459859**

removal. 12/14 - MF received call from James Brody, lawyer for owners of site (Wallack). 786-1800 x 12. I updated him on progress and future plans. 1/25/16 - Disposal info received. 07/20/2016 - Disposal info, analytical, clean up photos reviewed in DECdocs. -CLOSED

DEC Memo:	Caller believes a pipe is broken and instead of fixing it they clear it when it fills up. This has happened on numerous times. This was first noticed in 2002 when caller moved in. He reported it to the realty company and to William Tooney - who sends someone over to take care of it. Recently the caller sent a letter on the 16th or 17th of July of this year addressing the sewage problem and he hasn't heard anything from the landlord regarding the sewage problem or the other problems with his apartment. Caller is due to move out sometime in August.
Remarks:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was CHRISTENSEN/WATER? [COMPUTER SEARCH FINDS MARCUS THOMPSON AT 873 WESTERN Ave 12203, 459-7586; MABIN ON S. MAIN] 08-05-2004 - Refered to Ron Groves of the ACHD. Closed wtc

Contact Name:	ROSE MARY MAHONEY
DEC Memo:	CALLER STATES THAT THE CONTRACTORS BROKE SIX LAB THERMOMETERS (BIG ONES) SOME MERCURY REMAINED IN THE THERMOMETERS. CALLER STATES THAT IT HAS NOT BEEN CLEANED DUE TO CONTAMINATION.
Remarks:	9/17/08: KG spoke with Rosemary Mahoney. Clean Harbors was hired by OGS to perform the cleanup. The area was cordoned off and the vents were closed to isolate the area. KG notified Tom Brady of Albany County Health. Ms. Mahoney said several thermometers were broken as well as another mercury containing instrument located in a water bath . The water had been drained so mercury contamination entered that drain. (KG) 02/23/09 - Spoke to Rose Mary Mahoney about closure report. She e-mailed me a copy of the report. Clean up complete. Closed wtc

Contact Name:	JEFF MARX - CT MALE ASSOCIATES
DEC Memo:	spill on concrete floor. tank is removed, oil is removed and spill has been cleaned up.
Remarks:	2/9/16 - MF telecom w/ Jeff Marks. CTMale received an email from a woman about a tank. On 1/10/16, there was a smell in the basement. They discovered a small leak from abandoned UST. FD came and took care of immediate problem. Est less than 1 gallon. She then called a company who came and took the tank away and finished clean up. Ins Co then did borings outside and inside building. The found some hits in sump. Unknown where sump discharges to. CTM will send report. MF later met with CTM on site. Basement was as described as in CTM report. Overall, it appears that the tank had a leak and the majority of the spill stayed on the concrete, but some did enter the French drain and end up in the sump. 5/9/16 - Requested update from CTMale. Jeff Marx replied that the report was being reviewed and should be here shortly. 5/17/16 - CTM and previous Preferred report reviewed. Based on Preferred report, no signs of contamination were discovered in any of the borings. (MF confirmed this with Preferred on 5/17. While there was no GW samples taken from SB-4, Preferred mentioned that there was no signs of petroleum in the soils in the gw). Inquired with CTM regarding the final disposition of the remaining fuel oil and the tank. Based on the Preferred findings and on the CTM report, this spill can be closed, with the remaining fuel and tank info. 6/1/16 - Additional info on tank received from CTM. ..This email serves as a follow-up to your request to where the oil and tank from the 17 Daytona Avenue site was sent to. According to Kim, Willie Thomas took the remaining oil in the basement tank for use in cleaning blacktop tools related to his business. Also according to Kim, the tank carcass was removed by Brad Hoke and delivered to a junkyard. Willie can be reached at 427-0730 and Brad can be reached at 545-9881 if you would like further information. Please let us know if this is sufficient information for closure of the spill at this residence... Closed based on info.

DEC Memo:	While doing a divestment assessment they drilled down about 3-4 ft. near monitoring well #7 and discovered contamination. Groundwater was not affected. Clean up will happen during the replacement of the monitoring wells. Soil around the other monitoring wells was fine.
Remarks:	See Edocs; PBS 4-132306; see 8703160, 0102602, 0602097 (Edocs), 0604613, 0801772, 0901281, 0908998, 0909835. 2/26/10 - FOIL 10/042, Edoc CD 4/12/10 - FOIL 10/042B, Edoc CD, corrected CD 9/16/2010: Project transferred to Brad Brown due to Kokocki's retirement. (KG) 10/28/10 - FOIL 10/354 Edoc CD 8/7/12 - FOIL 12/283, Edoc CD w/spills & PBS 12/31/14 - FOIL 14/524, Edoc CD w/PBS 4-132306 06/20/2018 - Notes missing again... first round of injections completed. Two points were removed due to utilities in the vicinity. Two points located closest to the hottest MW were injected with 200 gallons of the magnesium sulfate. All other wells were injected with 100 gallons. -DJW 10/30/2018 - Received August GW Summary. Total VOC concentrations varied. No conclusions drawn. - DJW 08/23/2019 - Received April 2019 GW Summary. Dissolved contaminant concentrations have increased in several monitoring wells with respect to pre-injection levels, while other monitoring wells have shown some decrease and/or transient decreases with respect to pre-injection conditions. No free product detected in any well. Synergy will conduct verification sampling in quarter 3 of 2019. - DJW 07/31/2020 - TC with Synergy Environmental. Discussed injection results and continuation of monitoring and injections. Synergy suggested taking a closer look at current PBS compliance issues. Facility due up for an inspection late this summer. DJW will coordinated with TS and MR for inspection. -DJW 03/11/2022 - Dissolved contaminant concentrations in

EXXON MOBIL WASHINGTON AVE @ COLVIN (Continued) **S103271900**

several monitoring wells are consistent with respect to pre-injection levels, as well as following the initial injections, while other monitoring wells have shown some transient increases with respect to pre-injection conditions. 04/08/2022 - Emailed Eric Fetz requesting meeting. -DJW 05/24/2022 - Discussed PBS site with MJR. Requested information on most recent inspection performed in February. TC with Synergy Environmental. Concluded that the injections are ineffective. Discussed additional sampling and re examining a remedial technique. Sampling being conducted this in the next week or two. Meeting set up for end of June. 06/07/2022 - TC with MJR. Inspection from February determined the equipment was in good shape. MJR will check notes and see if the testing records were sufficient. -DJW 06/16/2022 - DJW telephone call with Synergy. DEC will continue to work on acquiring tank closure information regarding the waste oil and heating oil tank on site. Synergy will continue to generate a work plan for further investigation of impacts on site. -DJW 08/23/2023 - A limited PBS Inspection was conducted on August 2nd to investigate the status of two underground storage tanks that were reportedly closed and removed within the last 10 years. Through conversation with the facility owner, Nadeem Qureshi, it was determined that the tanks were likely removed in 2020 but proper closure procedures were not followed. DEC requested a workplan for meeting the subsurface investigation requirements for UST closure on a federal bulk storage site. Nadeem subsequently reached out to Longworth Environmental to develop a work plan and complete the tank closure report. Workplan submitted by George Longworth for review. -DJW 11/13/2023 - Received tank closure report from Longworth Environmental. DJW on site 09/27/2023 to examine boring locations and soil from tank grave. The report satisfies the departments requirement for tank closure. Sent Eric Fretz with Synergy a copy of the report and requested we schedule a meeting. -DJW 11/16/2023 - Synergy Environmental and the Department discussed the results of the limited subsurface investigation by Longworth and their plan moving forward for Spill #0602097. With the status of these tanks verified and the tank system on site in compliance, there does not appear to be an active source of new contamination on site. The DEC requested a workplan for the better delineation of offsite groundwater impacts, the collection of data to help locate a potential source area (specifically more data from underneath the canopy and pump islands), and a remediation strategy for the removal of source material and treatment of BTEX contamination in groundwater. The next meeting between the Department and Synergy Environmental is tentatively set for early December. -DJW

DEC Memo:	inside tank - cleanup done
Remarks:	JDU telecom with Main Care. Homeowner noticed odors. Main care tech responded and found a small drip from tank. Remaining fuel was pumped out of tank by main care and tank will be replaced. Small stain on concrete floor. Tech estimates less than 1 gallon spilled. Main care forwarded picture of stain on floor but there is also a lot of other debris, and it is hard to tell how much is impacted. Tried contacting homeowner to confirm no odors. No response. Spill can be closed if no response is received and no complaints from homeowner.

DEC Memo:	MF and D. Picket on site. 750 gallon tank removed. The tank filled up with water 2 weeks ago and a sheen was running down the driveway. The FD was called and they advised the homeowner to call ATS. ATS was on site today removing tank. Obvious contamination remains at the bottom of the excavation at appx 12'. Bottom of the excavation is appx 3-4 feet under the foundation. They will excavate more of the sidewalls and then sample. No water to speak of in the excavation. 11/24 - MF left message for ATS. 11/30- ATS Report rec'd. Composite bottom

HORAN RES BELVEDERE AVE (Continued) **S110540991**

sample marginally fails for both TAGM and 375. Sidewall passed. At the time of excavation, the bottom was as deep as ATS felt comfotable without jeopardizing the structure. No ground water encountered in excavation. Since this area is served by muni water and sewer, this spill can be closed, DNMS.

Remarks: Clean up in progress.

Contact Name:	SEAN REID
DEC Memo:	WENT BETWEEN RAILS, TO BALLAST . CLEANUP IN PROGRESS. delayed entry due to network outage. csx advised of spill # at 0539
Remarks:	8/5/21 - TC with Mike Dende. Locomotive was pulling into shop for maintenance, started leaking about 5 gallons of oil. They believe it was from the gas pump, but it was just after midnight so they did not get a good look at the time. Most of the oil landed on the track mat, a bit got onto the ballast and was dug up and put onto drying area. They are doing the maintenance this morning and will check to see where the oil came from. Spill is cleaned up, no drains impacted, they believe they got it all but area leads to on site waste water treatment plant if any residue was left and it started raining. Mike will be on scene later this morning to get eyes on the area and make sure it looks clean. No immediate response needed, Josh can check back with Mike when he is on site. MJR JDU Confirmed with Mike Dende that cleanup is complete. Waste to drying beds. Spill can be closed.

DEC Memo:	caller reporting mercury thermometer in the upstairs guest bathrooom broke in the sink believes product has went down the drain. clean up efforts started. caller wishes a call back in regards.
Remarks:	2/5/2023-TC with Wayne. Wayne was using his old thermometer for a more accurate temperature and accidentally broke the bulk on the sink drain. Most of the mercury settled around the sink drain. Wayne followed protocols from government website on how to clean up and dispose. Waste is sealed in garbage bag outside of living spaces. Residual mercury may have gotten down the drain. In total, Wayne estimates mercury lost was less than size of green pea and has been mostly recovered. Wayne will discontinue use of this sink and plan to find a plumber to take apart trap. Josh will follow up with him tomorrow and give guidance as needed. No response at this time. KO JDU telecom with Wayne and DOH. Provided guidance given by DOH that they recommend removing trap on sink and collecting any potential mercury for disposal. Wayne had already followed DOH guidance from web page and will dispose of waste. No further action required by DOH or spills. Closed.

DEC Memo:	loss to soil due to oil line leak, c/u pending
Remarks:	09/07/16 - TC with Eric Johnson (Main Care). Oil line leaked and appr. 15 to 20 gallons spilled onto poured concrete floor. He indicated floor was in good shape. Tank is 275 AST in basement. Oil was in center of floor and under some shelves. No edge drains. DP 09/07/16 - Main Care on site cleaning up spill. Spill due to leaking copper fuel line for 275 AST in basement. Line leaked near heating unit. Noted stain on poured concrete floor and some residual speedi dry. Sump not affected. No edge drain in basement. Poured concrete floor went right up to wall. Fuel line partially replaced. Advised homeowner that entire line should be replaced. Small quantity of contaminated material generated. CLOSED. DP

Site Description: Location: The NL Industries site is located at 1130 Central Avenue, in the Town of Colonie, Albany County, New York. The site is approximately 3 acres in size. Site Features: The site is currently a fenced and vacant property, with no on-site structures other than a

COLONIE FUSRAP SITE (Continued) **S103569296**

storage shed near the site entrance. Railroad tracks abut the property to the south. Current Zoning/Use: The site is currently zoned for industrial use. Properties to the north and east are zoned as Neighborhood Commercial Office Residential. The area beyond the railroad tracks to the south is residential. Past Use of the Site: In the 1950s, N.L. Industries began manufacturing uranium products at this location. Manufacture was allowed by a license that was issued by the Atomic Energy Commission (AEC), a predecessor to the Department of Energy (DOE). These activities ceased some time around 1984 when the DOE purchased the plant and began cleaning it up under the provisions of Formerly Utilized Sites Remedial Action Program (FUSRAP). During its operation the plant emitted depleted Uranium and lead through its air handling equipment, and these contaminants are known to have impacted site soil. Volatile Organic Compounds are also known to have been stored and discharged during the manufacturing period, and these compounds are known to have contaminated the groundwater at the site. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is for site soil and infrastructure. OU 2 was established for groundwater. Site Geology and Hydrogeology: The immediate site consisted of artificial fill intermixed with flood plain sediments. The fill overlays a unit of sand, sandy silts and clay. Generally, groundwater is encountered at less than 10 feet below grade. Water level measurements recorded at the Site indicate that groundwater flow across the Site is to the southeast.

Env Problem: The extent of environmental problems has been characterized. Some VOCs have moved off site via groundwater, and are being addressed. Remediation of the site was conducted under the FUSRAP Program by the United States Army Corps of Engineers. Radioactive materials have been removed in accordance with FUSRAP. Some non-radioactive contaminants remain in the soils (lead, arsenic) and groundwater. These are being addressed in accordance with RODs issued for the site and are being managed through the use of a Site Management Plan and Environmental Easement.

Health Problem: The site is completely fenced, which restricts public access. Measures are in place to control the potential for coming in contact with subsurface soil remaining on the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process which is similar to the movement of radon gas from the subsurface into the indoor air of buildings is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. Furthermore, environmental sampling indicates soil vapor intrusion is not a concern for off-site residences. The potential for exposures to contaminated dust in the interior of four off-site buildings is currently being investigated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/29/2024
Date Data Arrived at EDR: 03/01/2024
Date Made Active in Reports: 03/27/2024
Number of Days to Update: 26

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/29/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/29/2024

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/06/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers
Source: Department of Health
Telephone: 212-676-2444

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

WADSWORTH LAB
HARRIMAN CAMPUS ROAD
ALBANY, NY 12203

TARGET PROPERTY COORDINATES

Latitude (North):	42.676542 - 42° 40' 35.55''
Longitude (West):	73.805258 - 73° 48' 18.93''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	597894.1
UTM Y (Meters):	4725373.5
Elevation:	252 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14106112 ALBANY, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

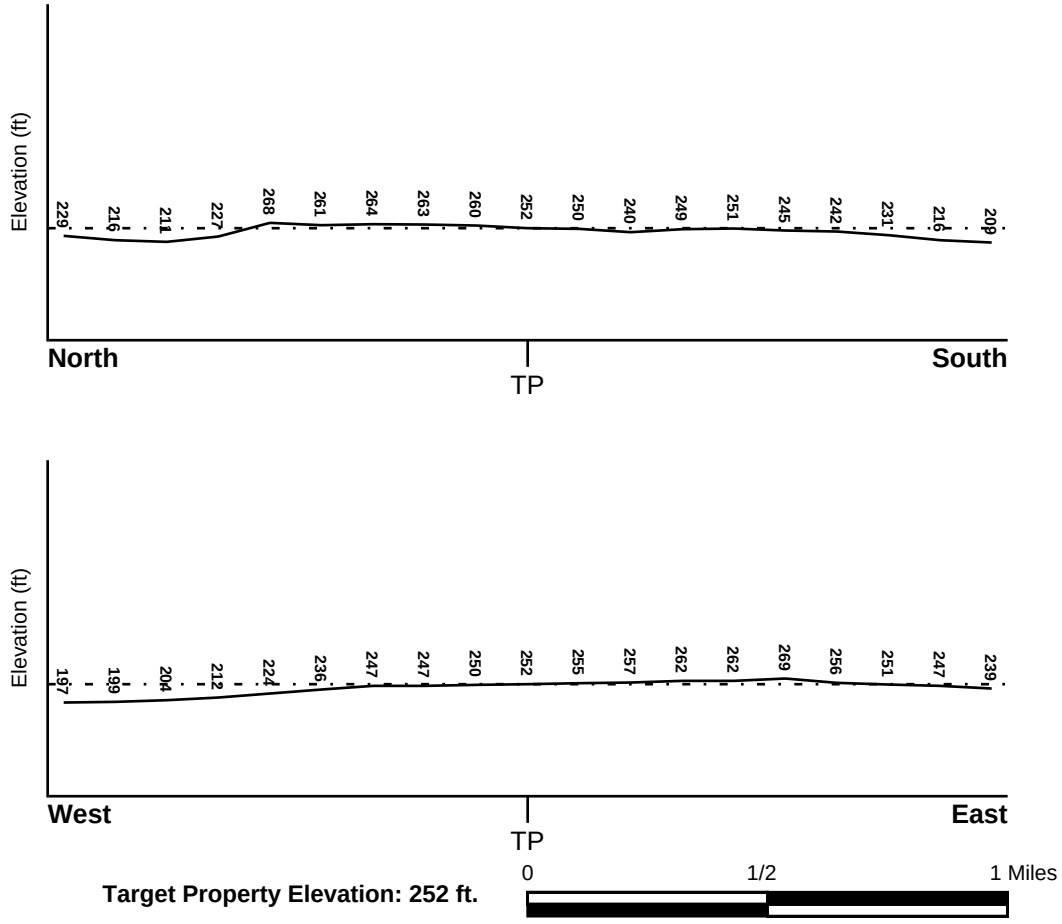

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36001C0191D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
36001C0179D	FEMA FIRM Flood data

36001C0187D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ALBANY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udipsamments

Soil Surface Texture: coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	70 inches	coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 5.5 Min: 3.6

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: 0.0015 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: Udipsamments

Soil Surface Texture: coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	70 inches	coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 5.5 Min: 3.6

Soil Map ID: 4

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 0.42	Max: 8.4 Min: 4.5
2	3 inches	70 inches	channery loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 0.42	Max: 8.4 Min: 4.5

Soil Map ID: 5

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: 0.0015 Min: 0	Max: Min:

Soil Map ID: 6

Soil Component Name: Colonie

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 14	Max: 7.3 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	7 inches	68 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 14	Max: 7.3 Min: 5.6
3	68 inches	74 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 14	Max: 7.3 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.
