

Building Resilient Healthcare Facilities Forum

Design Strategies for People and Performance

FEATURED SPEAKER

Brian Marman

Project Executive, Consigli Construction

Brian Marman is a Project Executive at Consigli Construction Co., Inc., bringing nearly two decades of experience primarily managing complex healthcare projects throughout the Northeast. Brian oversees the planning and delivery of technically sophisticated projects including ambulatory care facilities, critical infrastructure upgrades, occupied hospital renovations and large-scale outpatient medical buildings for clients such as Northwell Health, NYU Langone Health and NewYork-Presbyterian. Known for his collaborative leadership style and technical expertise, Brian has extensive experience overseeing projects that require complex phasing, occupied hospital operations, major infrastructure coordination and stringent infection control measures. His background spans both construction management and mechanical engineering, giving him a strong understanding of building systems integration and healthcare operational requirements. He is actively involved in industry and engineering organizations, including the Manhattan College School of Engineering Board of Advisors and ASHRAE's NYC Sustainability Council, and previously served as Co-Chair of the New York Building Congress Healthcare and Life Sciences Committee. Brian holds a Bachelor of Science in Mechanical Engineering from Manhattan College.
