

DASNY

Job Order Contracting (JOC) Program

Opportunities for MWBE and SDVOB Subcontractors and Suppliers

The Dormitory Authority of the State of New York (DASNY) is New York State's premier capital development authority. DASNY's Job Order Contracting or JOC Program is a type of procurement designed to provide faster contracting time to speed project delivery on behalf of our valued clients. JOC is well-suited for projects with urgent and time-sensitive requirements. The program uses term construction contracts that require contractors to perform ongoing maintenance, repair and minor construction projects. In 2018, DASNY executed work valued at \$54 million through the JOC Program.

DASNY is committed to diversity in all of its procurements. MWBE and SDVOB participation goals apply to the JOC Program. JOC prime contractors have ongoing needs for NYS-certified MWBE and SDVOB subs and suppliers to assist them to undertake the work orders issued by DASNY and to satisfy their contractual participation goals.

Listed below are firms that hold prime DASNY JOC Program contracts in the following regions: Mid-Hudson, Mohawk Valley, North Country, Central New York, Southern Tier, Finger Lakes, and Western New York. We encourage you to contact these JOC Prime contractors, introduce your firm, and explore opportunities to develop a relationship as a subcontractor or supplier.
