ADDENDUM NO.: 3  
IFB or RFP NO.: 674  
Description: Furnish, deliver and set in place filed trailer  
Project: SUNY Purchase  
Bid Opening Date: August 13, 2020

Specifics of the Addendum:

Bid Opening Date Extension:

This addendum is to reflect the change in the bid opening date from August 6, 2020 at 2:30 PM to August 13, 2020 at 2:30 PM. All bids are to be received by DASNY no later than August 13, 2020 at 2:30 PM.

Bid Breakdown & Schedule:

Revised Bid Breakdown is attached to this Addendum.

Response to Request for Information:

**Question 1:** I would like to know if used trailers are being accepted for the “new 24x60 trailer” or does it have to be new.

**Response 1:** The trailer will need to be new, not a used trailer.

**Question 2:** It was discussed at the prebid meeting that all low voltage work would be handled by others. Please confirm.

**Response 2:** Clarification - it was mentioned that internal low voltage distribution wiring would be completed by others. Contractor is still required to provide conduit and data boxes (3) per office and (3) in large space locations. See “General Notes” section of attached Plan Sheet SK-1.

Revised 7-13
Question 3: I need a firm scope of work regarding how and where we are tying in the electric. It may make sense to contract this out separately to a GC already working on site.

Response 3: See “General Notes” section of attached Plan Sheet SK-1, and Response 14, below.

Question 4: Please update pricing page to indicate monthly payments and include a line item for tear down removal at lease end.

Response 4: See revised Bid Breakdown attached to this Addendum.

Question 5: It was discussed at prebid that furniture removal and reinstallation would be by others. Please confirm.

Response 5: Yes, this will be handled by others. See Response 15, below.

Question 6: Please confirm we can demo existing trailer on site.

Response 6: Yes, the existing trailer should be demolished on site. The trailer has been tested and is free of hazardous materials.

Question 7: Please confirm no below grade footings are required under bldg. or decking.

Response 7: See “General Notes” section of attached Plan Sheet SK-1.

Question 8: Please confirm a HC ramp is no longer required.

Response 8: Confirmed. The HC ramp is not required for this trailer.

Question 9: Please confirm site restoration requirements.

Response 9: Yes, restoration is required of disturbed areas of lawn and areas below existing trailer that remain exposed after removal. See “General Notes” section of attached Plan Sheet SK-1.

Question 10: We had discussed change the siding and skirting to high rib steel and eliminating the need for pavers around perimeter of bldg. Please confirm.
Response 10: Confirmed. See “General Notes” section of attached Plan Sheet SK-1.

Question 11: Plan Sheet SK-1 indicates to provide metal stairs and guard rails yet Detailed Specifications; Additional items required; #2 states ADA/IBC Ramp with Switchback. Please provide clarification on what is to be provided for egress.

Response 11: ADA/IBC Ramp with Switchback is not required. Contractor is required to install stairs and guide rails, as shown on the attached Plan Sheet SK-1.

Question 12: Detailed Specifications; Additional items required; #3 states Window/Door Security Bundle -40+. What does the 40+ refer too?

Response 12: We are looking for security grills over the windows. See “General Notes” section of attached Plan Sheet SK-1.

Question 13: The Floor Plan shown on Sheet SK-1 reflects a 24x60 building dimension yet the Williscot Floor Plan Sheet reflects a 24x56 building dimension. Please advise on correct building dimensions.

Response 13: See attached Plan Sheet SK-1.

Question 14: Plan Sheet SK-1; General Notes; # 3 states to provide new data and power feeds as per DASNY field representative direction. What is existing power source? If it is determined that existing power source is adequate to support new field trailer would a field splice and ground mount J-box be acceptable? Or are we to extend power feed from power circuit?

Response 14: It is acceptable to field splice and utilize a ground mounted J-Box (handhole) for the power feed. The handhole shall be a box constructed of fiberglass or composite with minimum dimensions of 16”x20”x24”D. Provide weatherproof splices in the box and extend 3 #3/0 & 1 #4G in 2-1/2” conduit to new trailer location. Underground conduit shall be Schedule 80 PVC and above ground conduit shall be rigid galvanized steel. See “General Notes” section of attached Plan Sheet SK-1.

Question 15: Plan Sheet SK-1; General Notes; # 4 states remove and relocate trailer contents from old trailer to new trailer. Since

Response 15: General Note No. 4 was superseded by General Note No. 2 in the attached revised SK-1 dated 7/16/2020, however, a decision was made subsequently to deal with the relocation of contents as indicated in General Note No. 2 in revised SK-1.
7/16/2020 via a separate vendor. Therefore, the relocation of contents of trailer shall not be included in this bid.

**Question 16**: Plan Sheet SK-1; General Notes; # 5 states to provide vinyl trailer skirt and to include (4) automatic vents. Since the vinyl skirting is designed with integrated venting is there a need for the automatic vents? If automatic vents are required please provide clarification of type and model (i.e. temperature or humidity controlled?).

**Response 16**: See attached Plan Sheet SK-1.

**Question 17**: Plan Sheet SK-1; General Notes; # 7 states to provide pavers at perimeter of trailer skirt. In discussions with DASNY field representative, the concerns was the maintenance of grass and damage to the skirting. We are concerned with settling/movement of pavers which will impact integrity of skirting. Based on concerns raised by DASNY field representative we would recommend installing 2x4 PT skirt sub-framing 24” OC with a 5/4 x 6” PT Base to elevate skirting above grade and protect from maintenance of grass. Refer to attached detail for example.

**Response 17**: See attached Plan Sheet SK-1.

**Question 18**: The existing field trailer has gutters and downspouts. Are we required to install gutters and downspouts on the new field trailer? If so, please confirm on size of gutters and downspouts and if we are to flash to existing low slope roof.

**Response 18**: Yes. See attached Plan Sheet SK-1.

**Question 19**: Due to the length of lease and the requirement of a new 24x60 field trailer will DASNY consider an option lump sum price to purchase the trailer outright?

**Response 19**: See attached Revised Bid Breakdown attached to this Addendum.

All other terms and conditions of the original Invitation for Bids or Request for Proposals shall remain the same. This notice shall be signed and attached to the Invitation for Bids and shall form a part of your bid.
1. Disconnect power and data from existing trailer, TYP.

2. Contractor to provide 1 portable 208 cubic feet storage tank for office equipment and furniture storage. Remainder and storage contents from existing trailer as required. In place furniture and equipment in new office trailer as per Dany field representative direction. Coordinate relocations with Dany field representative.

3. Demolish and remove existing trailer from site.

4. Clean and grub new site for new office trailer as required by trailer manufacturer.Raised and restore ground to edge of existing trailer to the satisfaction of Dany field representative.

5. Provide office trailer pier at locations required by trailer manufacturer. See pier detail, sheet D1.

6. Provide 3, 48-inch round, long shank, and 30 mph wind resistance guys for trailer. Anchor trailer to ground. Provide quantity and locations as required by trailer manufacturer.

7. Extend power and data connections to new trailer. Provide data circuit and data power boxes as follows. Office areas are 3 data boxes. Locations are per Dany field representative.

9. Provide new paper path from trailer to exit. Paper path to be placed upon compacted, 4-inch crushed stone base.

10. Provide new stairwell at periphery, length of trailer, to ramps at 4 corners and 10 concrete splash blocks. Color to match trailer, TYP.

11. Provide wet fire detection activated spotlight at northwesterly corner of office trailer.

12. Provide window and door security package for trailer.
